MANUFACTURING FACILITIES ACHIVEMENT

Established 1985 Experience 40 years	100+ Products Customized water treatment & industry auxiliaries	20 + Patents	180 + Countries Clints worldwide
--	--	---------------------	--

Important Part of Production

 Measuring	 Samples detection	 Laboratory for Different Types of Chemistry
 Production	 Automatic solvent extraction	 Sample inspection
 Automatic instrument	 Automatic filling	 ICB Chemical Containers and Barrels

Application Field in AME

			
Sodium Polyacrylate	Anionic Powder	Cationic Powder	SLES Sodium Lauryl Ether
			
Sodium Aluminate (Metaaluminate)	Polyethylene Glycol	Solid Powder Defoamer	Sodium Thiocyanate

Application Field

Case and Application Field

Provide professional solutions for all types of water problems

		
Water treatment Used in urban sewage treatment/industrial wastewater treatment/potable water treatment ...	Textile Industry Used in textile wastewater treatment and textile production as thickening agent and textile sizing agent and so on.	Paper Mill Used in urban sewage treatment/industrial wastewater treatment/potable water treatment.
		
Mining industry Used in ore washing and flotation/mud settlement and clarification / solid-liquid separation of tailings and so on.	Oil & Gas industry Used in water shutoff, drilling fluid, fracturing fluid, oil extraction, fluid loss reduction, flocculation, shale inhibition, dilution, plugging, cooling and lubrication of drill bits and drill strings, camping cuttings, cementing and so on during Dilling process.	Other Fields Used in sugar industry/breeding/ agriculture/pharmaceutical/ architecture /construction and others.

1977 the company established in United Kingdom, we have been supplying different quality textile yarns including Cotton, Lycra, Polyester, Acrylic to companies in Africa and Middle East from leading manufacturers including ICI and DuPont. Following five years of operations, our textile clients requested that we identify reputable chemical manufacturers capable of supplying various chemicals needed for their integrated textile facilities. Over the years we became suppliers of chemicals not only to the textile industry but also to wallcovering manufacturers, paper making, food making auxiliaries as well as drinking water treatment chemicals, agricultural and petroleum chemicals. Throughout the years, our partner manufacturers have received numerous recognitions, such as the AAA Level Enterprise for Honouring Contracts & Keeping Promises and Advanced Enterprise awards. At the same time, they are approved ISO9001, ISO14000, Intertek, and SGS certificates. We have begun to explore overseas markets since 2010, exported to Africa, South America, Southeast Asia, and Europe etc.

Mission, Vision, Philosophy

Our Mission	Our Vision	Our Philosophy
Provide professional chemical auxiliary agents.	Provide quality consistency	Our success is customer satisfaction

Our Team

more than 80% of the team have a college degree or above. Our technicians graduated from reputable universities and overseas, have rich experience in project negotiation and customer service. In the past time, we have accumulated rich experience in water treatment customization and can provide perfect solutions for all avenues of life.

Products

- Water Treatment Chemical
- Textile Auxiliary Chemical
- Paper Making Chemical
- Food & Cosmetic Chemicals
- Drinking Water Chemical
- Agricultural Chemical
- Petroleum & Mining Chemicals
- Waterproof Coating Agent
- Sodium Thiocyanate
- Bacteria Agent
- Defoamer

WASTE WATER TREATMENT CHEMICALS

Water Decoloring Agent
(ZDHC)

DCDA

PolyDADMAC (NSF)

DADMAC

Polyacrylamide
powder&emulsion(ZDHC)

Polyamine

Defoaming Agent

Poly Aluminum Chloride

Flocculant For Tailing Water

Coagulant For Paint Fog

Heavy Metal Capture Agent

Bacteria Agent

Sludge
Conditioner

Fluorine-removal
Agent

Sodium
Aluminate

TEXTILE AUXILIARY AGENTS

Defoaming Agent

Fast Penetrating Agent

Levelling Agent

Dispersing Agent

Soaping Agent

Wet Rubbing Fastness Improving Agent

Thickening Agent

Sodium 3-Nitro-benzenesulfonate

Polyacrylamide powder&emulsion(ZDHC)

Fixing Agent (ZDHC)

Softening Agent

Waterproofing Agent

DMC

PAPER AUXILIARY AGENTS

Fixing Agent

Retention Aid Agent

Sizing Agent

Defoaming Agent

Cationic Conductive Agent

Anionic Trash Catcher

Calcium/Magnesium Stearate

Softening Agent

Dryer Stripping Agent

Kaolin

Chitosan

PETROLEUM & MINING CHEMICALS

Demulsifier

Clay Stabiliser/Shale Inhibitor

Mining Specialized Penetrating Agent

Dust Suppressant Agent

High-efficiency flocculant for filter press/drilling mud breakers

Defoaming Agent

Thickening Agent

Drilling Mud Treatment Agent/Filtrate Reducer Agent

Super Absorbent Polymer

Polyacrylamide powder&emulsion(ZDHC)

Sodium Thiocyanate

AGRICULTURE & DAILY CHEMICALS

Potassium Polyacrylate

Sodium Polyacrylate

Chitosan

Silicone Oil

Polyquaternium

Aluminum Chlorohydrate (ACH)

SLES

PEG

Our Services

We supply Professional customized chemical auxiliary agent in different fields

SAMPLES FOR TESTING

Welcome to send us your requirements or chemical specifications, we are more than happy to send you our samples for testing. We also customize customer requests to achieve their goals.

Customized

We meet our customers' requirements:

- Customized logo
- Customized packaging
- Graphic customization
- Water treatment solution customization
- Customer Specific Needs

Clean Water Clean world

What we do

Our company products cover many areas of water treatment, such as SAP, Water Decoloring Agent, Poly DADMAC, DMDAAC, PAM-Polyacrylamide, Polyamine, PAC-PolyAluminum Chloride, ACH-Aluminum Chlorohydrate, Coagulant For Paint Fog, Heavy Metal Remove Agent, Deodorant, Oil Water Separating Agent, Organic Silicon Defoamer, Demulsifier, Flocculant For Petroleum Sewage, Special Flocculant For Mining, Activated Carbon, Formaldehyde-Free Fixing Agent, Chemicals For Ro Membrane, DCDA...

We are committed to providing customers with quality services and excellent products. We sincerely welcome friends in the chemical industry all over the world to develop friendly business, mutual benefit, and work together to create a better tomorrow.

Why Choose Us

Rapid Response, Immediate Action, Excellent Quality, Credibility First' is our company's mission. We believe that we can meet various needs of domestic and foreign customers with high quality products, reasonable price, timely delivery, and professional services.

Our suppliers have been focusing on water treatment filed since 1985, providing chemicals and technical services for all kinds of wastewater treatment plants. They are one of the earliest water treatment chemicals producers. The products are exported to different markets including North and South America, Europe, Southeast Asia, and Africa.

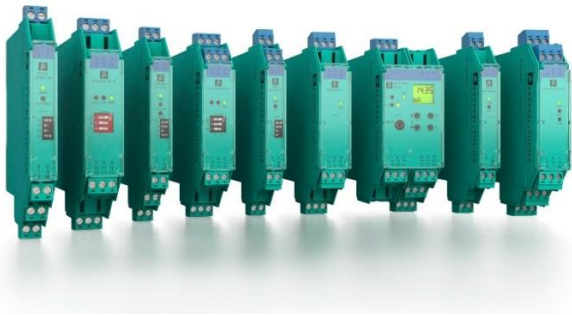

Energy Generation Processes in wastewater treatment plant

The following headings are to remain without changes : Application, Goal , Solution(**make amendments**) , Benefits, At a Glance, Five types of Chemicals....., Wastewater Treatment Plants....., Advance Water & Wastewater treatment Plant, Products (RO WATER TREATMENT CHEMICALS), The best technology to preserve.....(**make amendments as below**), Solutions for a sustainable world(**make amendments as below**)

Please make amendments in the website texts as below:

Next to Solution

K-System interface components for hazardous areas (replace the one image with the images below

Solution K-System interface components for hazardous areas The K-System portfolio offers interface components for all signal types and applications. Since digestion towers and their secondary systems are essentially explosion-hazardous areas, K-System isolated barriers can be used as interface modules. Transmitter power supplies report the level and pressure measurements in the digestion tower to the control panel while temperature converters report analogue temperature values. Frequency converters in conjunction with discrete sensors record and transfer motor data. Gas analysers transfer their results to the control panel via signal converters. The fill level and pressure measurements in the gas storage tank are transmitted in the same manner.

The best technology to preserve your water resources

We collaborate with our associates as subcontractor; they are leading specialists in water treatment. The teams design and deliver drinking water or wastewater treatment plants as well as smaller standardized water treatment equipment for industrial or municipal customers. They also offer a range of services (audit, maintenance, digital, etc.) to cover all water treatment plant management needs.

Solutions for a sustainable world – **Please make texts amendments to read as follows:** We create technologies for sustainable development. Our expertise is deliberately focused on preserving the environment: we help you reduce your carbon footprint and optimize your water consumption, in particular through our (ZLD) offer, which aims to reuse wastewater after treatment within the plant. We also offer you methanization solutions to exploit the energy produced from your plant’s water treatment. The biogas generated in this way can be consumed within the plant, in a nearby plant or

in the municipality's distribution network. We provided this for Artois Methanisation with our colleagues. Our objective is to help you preserve water and energy resources.

Our expertise at your service - Please make texts amendments to read as follows:

Our associate's global presence and their 160 years of experience are unique in the world and allow them to base their technologies on years of practice and innovation to best serve the customers. We are constantly evolving to meet your needs, whether in after-sales services or product innovation.

Replace the lady's image with the following image:

Being competitive while preserving water resources is possible- Please make texts amendments to read as follows:

Our solutions are designed to make you more competitive: reducing your operating costs, strengthening your company's social responsibility and ensuring the efficient management of your installations. To meet your needs as quickly as possible, we have also developed a range of standardized products and are constantly working on the development of new offers to adapt to changing needs and long-term development.

The water reserve image below is to remain.
